Introducing the New and Improved SureClose Print Driver

Uploading your documents into SureClose has never been easier using the new search features, and .pdf conversion options in the new and improved SureClose Print Driver 3.0!

What is the SureClose Print Driver?

SureClose

SureClose Print Driver is a utility program used to upload documents directly to your SureClose Messages, or to a specified placeholder on a file.

What's New in this Release?

- The ability to print multiple documents to the SureClose Print Driver window before uploading to SureClose.
- The ability to upload multiple documents to your SC Messages Inbox at one time.
- The ability to Split and Merge documents before uploading to SureClose.
- The ability to Reorder pages within a document before uploading to SureClose.
- The ability to use with Mac OS X.

Print to Messages Tab

Use the Print to SC Messages tab to upload documents to your SureClose Messages or to a specified document placeholder in a file. If uploading to a specific document placeholder in a file, then you must type the File Number, Import Code and Permission Key.

Print to File Tab

<Any Status>

Archived

File Type>

MLSF

Use the Print to File tab to upload documents to a placeholder by searching for an existing file, or your most recently used file by clicking the **Recent File** button. Selecting a file displays a list of available folders and placeholders to upload a document to. If needed, click the **Create Placeholder** button to create a new placeholder. If the file does not already exist, click the **Create New File** button to create the file in SureClose. It's that easy!
